De Kamer,

gehoord de beraadslaging,

overwegende, dat verschillende nationale en internationale rapporten de potentie omschrijven van Concentrating Solar Power (CSP)-installaties ten bate van opwekking van zonne-energie in gebieden rond de Middellandse Zee, inclusief Noord-Afrika;

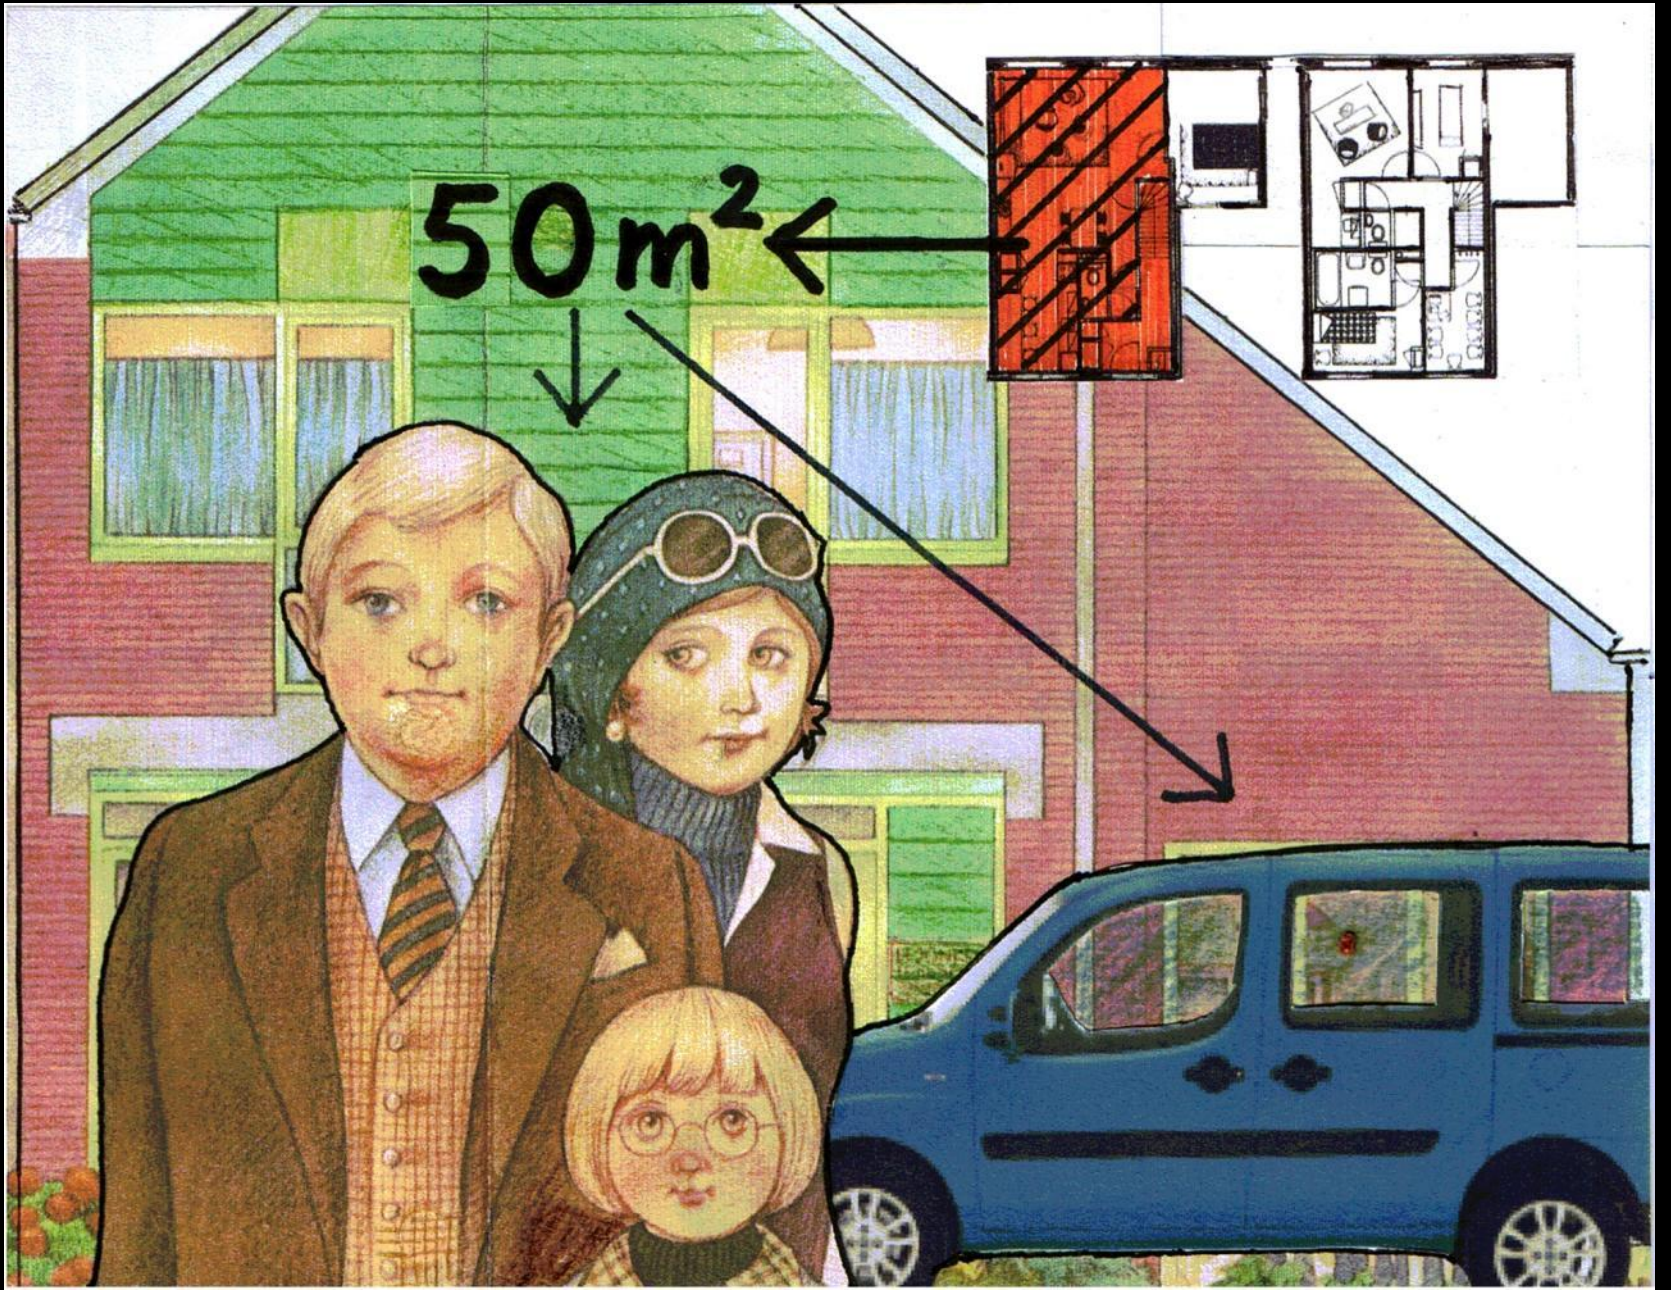

overwegende, dat mogelijke Nederlandse investeringen in CSP-installaties in deze landen effectief gebruik kunnen maken van de hoge zoninstraling en ligging, en dat de opgewekte energie kan worden benut voor de Europese markt;

overwegende, dat het transport van elektriciteit kan worden ondervangen door in te zetten op een combinatie van hoogwaardige elektrische infrastructuur naar Europa, toepassing van het Clean Development Mechanisme, en het benutten van Europese groencertificaten;

verzoekt de regering in overleg te treden met landen in het Middellandse Zeegebied, inclusief de Noord-Afrikaanse landen, over de toepassing van CSP, en binnen de Europese Unie initiatieven te ontwikkelen om een gezamenlijke inzet op CSP-installaties mogelijk te maken,

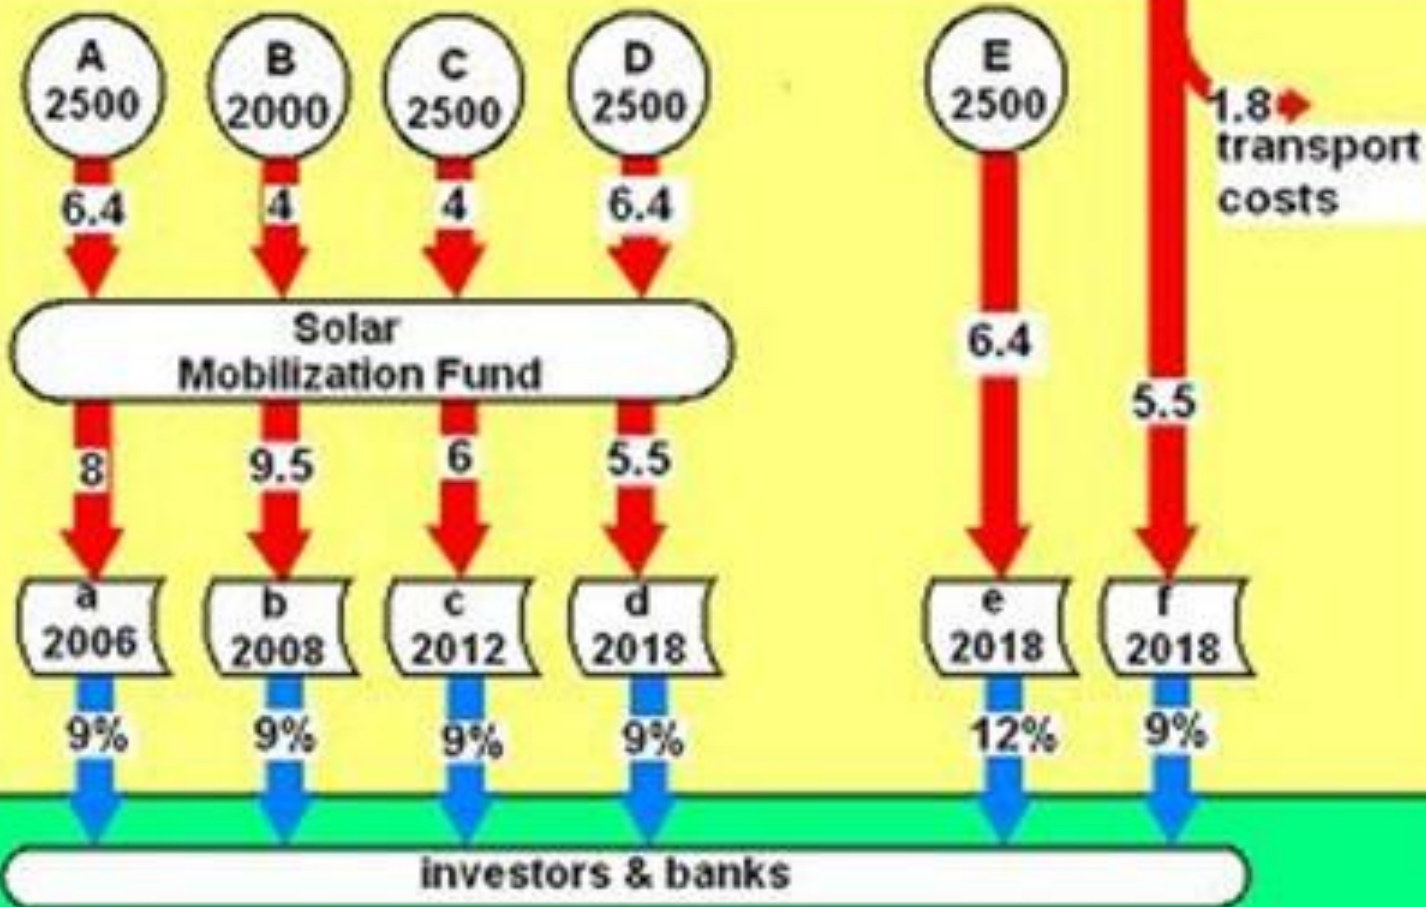

en gaat over tot de orde van de dag.
