L.s.,

As an interested citizen in The Netherlands in monetary issues, I learned recently about de huge publication about the aspects of money structure and mistakes in monetary policies in the Netherland and in the rest of the world as well.

I hereby present mr. H.H. Bor (alias Hank Monroby) as the scientific researcher and publisher of his huge investigation about the aspects of money creation and the lack of it during the post war period from 1965 until 1981, the day of his publication.

Here I present the front page of his work in this letter and ask you to read it (in Dutch) and put his person as a candidate to the Committee for te Nobel Prize for Economics.

[Click](#)

As I am impressed by the conclusions of his work, I must say that here are possibilities to repair the financial crisis all over the world when using private capital by entrepreneurs as a copy of the system in Switzerland, named the Wirtschaftsring in Basel. The Swiss proved that a supplementary money system to the official monetary system works very fine, and increases productivity en employment.

So I hereby offer the Committee in writing and signature my support to his candidacy
